**Subject:** Windows Project

While the window installation is almost complete with interior finish work remaining, I did not want to delay my thank you any longer.

First, I thank Joe and Jorge and staff for their extraordinary efforts in getting us back into my apartment with minimal discomfort and inconvenience. It was a pleasure to be the beneficiary of the way they handled this aspect and the coordination of all elements of the project.

We had the opportunity to use the Phase Two common facilities while we had to be away from our unit and they are terrific, a perfect place to hangout. A job well done!

We thank the contractor who was able to get most of the job done in 2 days. When we compared the timing to other people who've gone through a similar process in their buildings, they dealt with contractors who took weeks not days.

Finally, I want to thank all current and former board members who worked so diligently to get this critical project underway in a first class manner. If the windows and the contractor's work performs as well, this will be a home run of epic proportions.
